PetroPAN PP-Defoamer

Liquid, water-soluble defoamer

- Description PetroPAN PP-Defoamer is a liquid, water-soluble defoamer.
- Applications PP-Defoamer is used for cleaning work with increased foam development.
- Specification PP-Defoamer is a liquid, white and viscous emulsion.
- Processing see table

	dilution	application
1	1:10	Dilute with water and stir briefly, then spray on the foam as a spray mist.
2	1:1 bis 1:10	Diluted with water, fill into the waste water tank, ensure even distribution (0,5 to 1 l PP-Defoamer for 1000 l waste water)
3	1:1 bis	Dilute with water and spray onto the road surface. Then vacuum with the implement. Then all parts of the equipment involved in foam formation are wetted.

- Storage Store in a cool and dry place under lock and key. Protect from frost. Shelf life of at least one year if stored properly.
- Disposal The mixture produced by the cleaning process is to be treated in accordance with the legal provisions.
- Hazard- and Precautionary-statements not applicable
